

'Deep' does not mean clever. It means **layers**.

EACH LAYER SEES A BIGGER PICTURE

Nobody programmed these stages — depth forced them

- 1 Layer 1 sees only **edges** — light meeting dark.
- 2 Layer 2 combines those edges into **shapes**.
- 3 Layer 3 combines shapes into **things**: an eye, a wheel, a letter.

REMEMBER THIS

Nobody programmed those stages. Depth forced the network to find them.
