

Same word. Two completely different meanings.

THE SAME WORD, PULLED TWO WAYS

The bank was steep

river

The bank was closed

money

Attention weights which neighbours matter

- 1 'The **bank** was steep.' 'The **bank** was closed.'
- 2 The model reads the whole sentence and **weights** which words matter.
- 3 'Steep' pulls it toward the river. 'Closed' pulls it toward money.

REMEMBER THIS

That weighting is attention. It is why context finally worked.
