

Your model is getting worse right now

NOTHING IN THE CODE CHANGED

No error. No crash. No alert.

- 1 Nothing in your code changed. The **world** changed.
- 2 A model trained on 2023 shoppers meets 2026 shoppers.
- 3 Accuracy falls quietly. **No error. No crash. No alert.**

REMEMBER THIS

You find out when a customer complains. Monitor inputs, not just uptime.
