

Wrong question: **which AI tool is best?**

WHAT DOES A WRONG ANSWER COST YOU?

same tool, two very different jobs

DRAFTING A WHATSAPP REPLY

wrong answer costs:

10 seconds

just retype it

→ no checking needed

SUMMARISING A RENT AGREEMENT

wrong answer costs:

a missed clause

you find out in court

→ cite + read the source

Same model. Same speed. Completely different amount of checking.

Match the effort to the cost of the mistake, not to the hype

- 1 Drafting a WhatsApp reply? A wrong answer costs you **ten seconds**.
- 2 Summarising a rent agreement? A wrong answer costs you **a clause**.
- 3 Same model. Same speed. Completely different amount of checking.

REMEMBER THIS

Match the effort to the cost of the mistake, not to the hype.
