

Show, don't describe

SAME TASK, TWO PROMPTS

asking a model to reply to a customer on WhatsApp

DESCRIBE IT

"Reply politely and formally"

model guesses what you mean

OUT:

"Dear Esteemed Customer,
We are in receipt of your
valued communication..."

SHOW ONE EXAMPLE

IN: "order late?"

OUT: "Sorry sir, aapka order
kal tak aa jayega."

OUT:

"Sorry ma'am, delay ho gaya.
Aaj shaam tak deliver
ho jayega."

One example fixed tone, length and language together

Instructions guess; examples pin it down

One **example** beats three paragraphs of instructions. Every time.

- 1 'Write formally' is vague — the model guesses what you mean.
- 2 Give one input and one ideal output, and it matches the pattern.
- 3 Two or three examples pin down tone, length and format together.

REMEMBER

When a prompt is not working, add an example before adding more words.
