

99% in practice. 60% in the real exam.

SAME PRACTICE TEST · DIFFERENT REAL EXAM

drops 39 points → OVERFIT

holds steady → LEARNED

The GAP between the two bars is overfitting

- 1 Rohan memorised last year's paper, word for word. Meera understood the chapters.
- 2 Practice test: Rohan 99%, Meera 85%. Rohan looks better.
- 3 Real exam, new questions: Rohan drops to 60%. Meera holds 84%.

REMEMBER THIS

The GAP between training and test accuracy IS overfitting. Nothing else.
